

**EMPOWERING AGILE BUSINESS WITH OPENBRAVO 3**

Organizations of all sizes seek the benefits of ERP, but many small and medium enterprises (SMEs) consider it too expensive, hard to use and inflexible. Our agile ERP delivers the efficiencies of an integrated, web-based information system, while also enabling the business agility needed to capture opportunity and respond to changes in your business practices and competitive landscape.

- :: **Highest Productivity**
- :: **Business Agility**
- :: **Sustained ROI**

**HOW OPENBRAVO 3 EMPOWERS AGILE BUSINESS**

- :: **Highest Productivity**  
**Agile business starts with organizational & individual productivity**

  - Optimize operating efficiencies with best practice core ERP coverage.
  - Link strategic KPIs to operations with embedded analytics & configurable workspaces.
  - Achieve easy end user adoption and high throughput with web-based, multi-tab UI that is intuitive and empowering, with fast & flexible access to information.
- :: **Business Agility**  
**Openbravo 3 enables a culture of organizational responsiveness**

  - Easily adapt to changing market conditions with extensible, modular architecture.
  - Roll out quickly to new locations and partners with 100% web deployment.
  - Comprehensive core functionality with ability to incrementally extend via native modules and widgets, and to easily interoperate with other apps.
- :: **Sustained ROI**  
**Openbravo 3 changes the economics of ERP adoption for SMEs**

  - Low initial investment with pay-as-you-grow subscription and cloud deployment option.
  - Open source cost-effectiveness is strategic for full roll out to internal & external users.
  - Monthly automated maintenance packs keep you running smoothly.
  - Keep control with the innovative open source ERP you can truly make your own.

## OPENBRAVO 3 FUNCTIONAL FOOTPRINT

### • Master Data Management

**Accurately model your enterprise, with full multi-tenant and multi-organization support.** Standard objects include product, component, bills of material, customer, vendor, employees, warehouse, etc.

### • Procurement Management

**Minimize acquisition costs** with purchase planning, purchase orders, goods receipts, invoice registration, etc.

### • Warehouse Management

**Achieve optimal inventory control and customer satisfaction** with management of warehouses and bins, units, lots, serial numbers, packages, labels, receipts and deliveries, movements between warehouses, inventories, stock valuation, transport, etc.

### • Production Management

**Streamline production and control costs** with BOM, production plans, MRP, manufacturing orders, job reports, work incidences, preventive maintenance types, etc.

### • Sales Management and Customer Relationship Management (CRM)

**Drive profitable client interactions** by managing prices, rates, varying quantity sales orders, shipments, invoicing, volume discounts, commissions, etc.

### • Project and Service Management

**Improve project profitability** by tracking projects, phases, tasks, resources, budget, expenses and expense invoicing, related purchases, etc.

### • Financial Management and Accounting

**Achieve financial control and streamlined payment processing** with integrated GL, AP, AR, chart of accounts by organization, bank accounting with reconciliation, budgets, taxes, balance sheet, P&L, fixed assets, etc.

### • Embedded Analytics

**Improve decision-making and strategy execution** with flexible reporting and easy browser access to key operational and business intelligence.

## THE UNIQUE VALUE PROPOSITION OF OPENBRAVO 3

### :: Comprehensive

#### Broad, streamlined functionality

- **Rich Functional Footprint:** Integrated Accounting, Sales & CRM, Procurement, Inventory, Production, and Project & Service Management.
- **Openbravo Exchange:** Provides easy access to extension modules, professional localization packs, and industry solutions, for a best-fit implementation.
- **Scale with Ease:** Grow seamlessly from single-instance to multiple tenants, organizations, localizations, warehouses.

### :: Innovative

#### True web-based open architecture

- **Highly Productivity Web Application:** Advanced multi-tab browser UI, configurable role-based workspaces, and web services for easy interoperability with other applications.
- **Simple to Extend and Upgrade:** Codeless & model-driven, allowing non-programmers to easily add new functionality adapted to unique needs.
- **Flexible Deployment:** On premise or on the cloud, single or multi-tenant, on Windows or Linux, there are options for every need.

### :: Cost-Effective

#### High value at predictable low cost

- **Minimal Upfront Investment:** Subscription model allows “pay as you go” customer control, and avoids capital expense.
- **Transparent Pricing:** Easy to understand, no hidden fees, no haggling over price.
- **Quick Start, High Return:** Go live quickly with a standard, best-practices implementation, incrementally extend and grow the solution over time.
