Openbravo launches affordable ERP Professional Subscription with Openbravo ERP 2.50

*- Professional Subscription offers production grade benefits for commercial deployments
of Openbravo software -*

Barcelona, Spain and Cambridge, Massachusetts – May 20th – [Openbravo](#), the leading developer of web-based open source [Enterprise Resource Planning \(ERP\)](#) and [Point of Sale \(POS\) solutions](#) for businesses, has released the new version of its Openbravo ERP software, version 2.50, as a professional subscription service designed to meet the needs of small and enterprise businesses.

Openbravo Professional Subscription, previously known as Openbravo Network, combines market-leading software with professional support for mission-critical environments, now more affordable in price.

Available for implementation through Openbravo's extensive [partner network](#), the subscription service provides access to certified updates and upgrades, IP indemnification, bug-fixing and lifecycle guarantees for optimal business continuity.

The single server SMB Professional Subscription provides smaller businesses with support for Openbravo ERP, and is also available as a software appliance with automated maintenance. The multi-server Enterprise Professional Subscription edition provides larger businesses with even greater scalability with support for cluster environments. Both editions will allow for equally unlimited functional flexibility.

Openbravo ERP 2.50 expands on the flexibility that is inherent to Openbravo's products by introducing a modular architecture. With a host of new features and functions that are developed by the community, users can either browse and use shared functionality created by other users or deploy third-party modules that they develop.

New features that will appeal to users include support for right-to-left languages such as Arabic and Chinese, additional smart-build processes, autosave, more user alerts and enhanced support for complex organizations.

[Manel Sarasa](#), CEO of Openbravo said, “*With the release of Openbravo 2.50 Professional Subscription, businesses have access to the improved features of Openbravo ERP 2.50 with simple customization from its new modular functionality, and professional support. Businesses can deploy Openbravo to meet their exact needs and support their growth. It allows organizations to reduce costs and improve the efficiency of the back-end of their business, all with the peace of mind of expert support.*”

For more information, those interested can attend an [online webcast](#) demonstration, download the community version by visiting [Openbravo](#)'s website or get in touch with an Openbravo Business Partner by [contacting Openbravo](#).

About Openbravo

Openbravo is an award-winning developer of professional open source solutions for businesses, offering the industry's first real alternative to proprietary software. The company's web-based Enterprise Resource Planning (ERP) and Point of Sale (PoS) solutions, the most popular in their market, have been downloaded more than a million times and are used in over 50 countries.

Openbravo's growth is fueled by an ever expanding international community of users, partners and developers. The company's commercial open source business model eliminates software license fees, providing support, services, and product enhancements via an annual subscription.

Openbravo is venture backed and has received record funding in the Open Source ERP space from Amadeus Capital Partners, GIMV, Adara Venture Partners and Sodena.
