## **OPENBRAVO REACHES 200,000 DOWNLOADS**

*Openbravo's open source ERP downloaded more than 200,000 times since publication in April 2006*

**Pamplona, Spain, June 8, 2007** – Openbravo ([www.openbravo.com](http://www.openbravo.com)), the leading professional open source enterprise management (ERP) solution for small and midsize enterprises (SMEs), has exceeded more than 200,000 downloads of its software.

Ever since the launching of its product, Openbravo has remained a popular download on SourceForge.net: the world's largest development and download repository of open source code and applications.

Manel Sarasa, CEO of Openbravo said, “At Openbravo we are witnessing the rapid adoption of open source applications.

We now work with a wide range of customers and partners that support us as a company, as well as a very active community of developers. Each of these groups has played a key role in driving Openbravo to its leading position in open source ERP.”

### **About Openbravo**

Openbravo is the leading professional web-based open source enterprise management (ERP) solution for small and midsize enterprises (SMEs). It delivers a fully integrated, web-based ERP system tailored to the needs of any company, regardless of size or industry sector. The functionality of Openbravo is in continual growth thanks to an expanding international community of users, partners and developers.

Openbravo helps companies to manage daily operations, optimize business processes, enhance customer satisfaction and ultimately increase profitability. In January 2006, Openbravo secured a €5 million (\$6.4m) financing agreement with Sodena - record funding for an open source ERP company - to fuel further software development and international growth. Openbravo is also back to the Open Solutions Alliance – the new independent consortium to educate and inform businesses deploying open source, while promoting best practice and interoperability among vendors – as a founder member.
