

## Openbravo lands in San Francisco, CA!

*Openbravo, the only Spanish company present at LinuxWorld San Francisco, CA*

**Pamplona, Spain – August 11<sup>th</sup>, 2006.** Openbravo, provider of the leading web-based professional open source enterprise resource planning (ERP) system for small and midsize enterprises, will be the only Spanish company present at the LinuxWorld Event to be held in San Francisco (CA) on August 14-17, 2006.

LinuxWorld, the world's most comprehensive marketplace for open source products and services, will gather over 200 exhibitors and include conferences by distinguished professionals in this area.

Openbravo is an web-based professional open source ERP for small and midsize enterprises (SMEs), which has been successfully implemented by many companies in the distribution, services and manufacturing industries, regardless of size. The system's revolutionary architecture results in a better way to build software applications and permits users to save on license fees, thus optimizing the implementation investment.

Given the great interest shown by the global community after Openbravo's launching, the company has received numerous partnership applications from every continent, all of which highlights the great potential of this better-in-class open source software.

In just a few months, Openbravo has reached the first position on the ERP project ranking at SourceForge (the world's largest open source software development website that registers nearly 150,000 projects), has signed collaboration agreements with national partners and is in advanced talks with a number of partners from all over the world.

In 2001, Openbravo was founded in Pamplona, Spain, under the name of Tecnicia; in 2006, the company secured a €5 million financing agreement with Sodena to fuel further software development and international growth.

### **About Openbravo**

Openbravo is the leading professional open source enterprise management (ERP) solution for small and midsize enterprises (SMEs). Driven by open source philosophies and best-in-class services, it delivers a fully integrated, web-based ERP system tailored to the needs of any company, regardless of size or industry sector. The functionality of Openbravo is in continual growth thanks to an expanding international community of users, partners and developers. Openbravo helps companies to manage daily operations, optimize business processes, enhance customer satisfaction and ultimately increase profitability. And because it is open source, Openbravo puts the customer in full control without the overheads of contracts or licenses. In January 2006, Openbravo secured a €5 million (\$6.4m) financing agreement with Sodena - record funding for an open source ERP company - to fuel further software development and international growth.
