

OPENBRAVO FOR QSR AND FAST CASUAL RESTAURANTS

The quick service POS
that keeps your customers
and employees loyal

ORDER NOW!

MENU

Seamlessly manage operations across multiple locations in real-time

Control all your restaurants, create different zones for order taking and delivery and gain a centralized and single view on all sold menus and products from one single place.

Allow for greater menu diversity with rapid and flexible menu creation

Easily set up new menus, including products and product modifiers and push menu updates to all locations in near real-time.

Increase customer loyalty with quick, personalized and convenient order taking

Speed up order entry, allow for order customization and flexible payment and delivery options.

Increase profit margins with flexible menu pricing

Optimize prices with a flexible engine to manage special offers, prices for each restaurant area (bar, terrace) and delivery mode (local, takeaway).

Increase revenues with line busting

Reduce waiting time and offer better service by allowing your associates to take orders from mobile devices.

Boost employee satisfaction with a POS that is very to use and learn

Offer employees an intuitive and very easy to use point of sale system that they will love.

Enable a variety of touchpoints

Leverage a rich POS user interface that enables the adoption of a variety of restaurant touchpoints (desktop, mobile, self-ordering).

Cloud and mobile resistant POS

Avoid local servers and service interruptions, even if your internet goes down, and gain freedom to use the POS terminals of your choice.

Modular and easy to integrate

Adopt a fully modular technology that lets you expand as you grow and connect more easily with a variety of systems and technologies such as delivery platforms, online ordering and kitchen systems, ERP solutions and more.
