Introduction

This is an online functional course that provides the student with step-by-step exercises on how to configure the Openbravo backoffice in order to use the Commerce Suite. The student should have successfully completed the Commerce Functional Training 1 and be familiar with the functionality of WebPOS.

This self-study course is offered on-demand and can be started straight away!

Audience

The course is aimed at functional consultants that need to learn the configurations executed during an initial implementation of the Commerce Suite.

 - Manual role and approvals
 - Additional functional modules
- **Chapter 3 - Discounts and promotions**
- **Chapter 4 - Configuration troubleshooting**
- Exercises
- Quizzes

Format

Online Elearning Format

The format of the Openbravo Commerce Functional Training 2 is a self-study training with support from a trainer by livechat and support portal, providing the student with a strong learning experience. Here are some of the highlights:

- the training can be **enrolled to at any time** and **started straight away**
- **course access** to the online e-learning platform is granted for a period **21 days** from the start of the enrolment
- the format is **self study without live lectures**
- **Around 40 hours** of study is estimated to be required by the student
- **support** is offered through 2nd level support portal (for partners) or an integrated course forum (for 3rd parties)
- **IRC live chats** for a more interactive help and guidance
- exercises should be executed in an **Openbravo On Demand** instance.

Requirements

Knowledge prerequisites

- Successful completion of the Commerce Functional Training 1 is required.

Computer Requirements

- A compatible web browser. Due to the fact that Openbravo 3 is a **rich-internet-application** and the **WebPOS offers offline functionality**, only Webkit based browsers are supported:
 - Google Chrome
 - Apple Safari
